Application consideration

RCB1184 : Lu-165

Please keep in mind following points :

- High rate of dead cells as a result of thawing.

- Grow slowly.

- Don’t change medium on the next day of thawing.
  Keep observing cells for 1 week without medium change.

- When cells grow poorly after thawing, please passage cells by dilution without centrifugation.

- When cells become large aggregates,
  please disrupt them to small clusters by pippeting up and down.
